

# Automation 2011 in Mumbai, India

November 4, 2011

Reported by Chikara Arai, A&D Instruments India Private Ltd

A&D Instruments India Pvt Ltd (A&D India) participated in the Automation 2011 exhibition in Mumbai, India held September 20 to 23, 2011.

Automation 2011 is a four-day automation event to introduce new and upcoming technology for the year. Be it factory automation, robotics, drives and controls, logistics, hydraulics and pneumatics, building automation, pumps and valves, or software solutions, it is India's biggest Automation show of the year. Three hundred and six exhibitors participated in this exhibition.

A&D India exhibited various types of weighing instruments: electronic balances, platform scales, indicators and controllers, moisture analyzers and viscometers, and more. We emphasized that A&D India offers solutions to the problems of customers using A&D products. We focused on the following areas at this exhibition.

- (1) Data transfer from balance/scale to PC via LAN, RS-232C, and Data Logger
- (2) Waterproof scales and balances to meet IP69K, IP68, and IP65 specifications
- (3) Comparator functions for checking systems
- (4) Measurement of minute amounts of moisture in plastic material
- (5) Continuous measurement of viscosity by the SV Series
- (6) Weighing indicators/controllers for weighing system applications
- (7) A&D's total solutions for various weighing applications
