In addition to introducing A&D's activities, projects and products (display of our present main products and ***new ones -BM Micro analytical balance, MC Mass Comparators, and EM platform scales-***), we set aside time for attendees to freely share with A&D any requests they had.

Why 0.2?

We had the same kind of meeting in Dubai in Jan. 2008 (AWSM 0.1). This time we called it AWSM 0.2, since A&D committed to having the same kind of meeting again (in FY 2012) and holding this meeting on a continuing basis. We are already planning to hold AWSM 1 in March 2013 because of the importance A&D places on the Middle East and African areas. (May I consider your country of Turkey as part of the Middle East, my dear friend Small Tiger?)

Thank you to all attendees, especially the AND people in the Gulf for their good preparation.

See you all of you next year!!
