

It is getting colder and colder as winter approaches, but that is not the case in Indonesia, in terms of either weather or business.

<u>PT Libra Emas Permata</u>, our valued agent in Indonesia, will be participating in what may be the last exhibition for A&D's weighing instruments in this calendar year – <u>Manufacturing Indonesia</u> – at Jakarta International Expo Kemayoran, 5 –8 December.

Targeting the manufacturing industry, their booth (Hall D – 9433) will feature such products as the <u>AD-4408</u>, <u>AD-4410</u>, <u>SC/SE</u> series, and <u>HR-AZ/A</u> series. It will be the premiere of the AD-4410 vibration-resistant indicator in Indonesia, so don't miss this chance to see it if you will be in the area during the exhibition period!
