   GF-M series

Weighing

Setup

1. Replace the normal weighing pan with the animal weighing bowl (GXK-012).

Measurement

2. Press the [RE-ZERO] key to cancel the weight (tare).
3. Place a sample animal in the bowl to weigh it.

Caution

□ **When using the animal weighing mode (Hold function), the average weight of the animal can be displayed.**

□ **When using this option, the weighing range that can be used is an approximately 1.5 kg less than the weighing capacity.**

□ **If necessary, use the GXK-012 lid.**

□ **When performing sensitivity adjustment with the balance, use the normal weighing pan.**

□ **If performing sensitivity adjustment with the balance that has the animal weighing bowl on it and then replacing it with the normal weighing pan, $-E$ is displayed. When using the normal weighing pan again, re-perform sensitivity adjustment with the balance that has the normal weighing pan on it.**
